The amendment filed February 28, 2005 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The terminology "Dowex TM polymeric sulfonic acid H<sup>+</sup>" (paragraphs 0290, 0298 and 0470), "1-bromo-3-fluoro-propane (paragraph 0459) and "3-bromo-1,1,1-trifluoro-propane (paragraph 0463), "white solid" (paragraph 0283) and "dropwise" (paragraph 0476) was not disclosed or suggested by the specification as originally filed.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim 21 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The terminology "substituted alkyl" and "substituted alkoxy" lacks enablement since it encompasses a large number of possible substituents and it would take an undue amount of experimentation to determine which specific substituents will resulting a compound having the desired activity. The specification fails to provide any guidance or direction on how to chose specific substituents which will result in compounds having the desired activity. Note that the term "substituted" encompasses all chemical moieties such as alkyls, heterocyclics, steroids, amino acids, peptides and carbohydrates. There is a good reason to doubt that a compounds for example, substituted by an alkyl will have the same activity as compound substituted by a peptide.

Applicant's arguments filed February 28, 2005 have been considered but have not been found persuasive.

The specification fails to provide definition for the term "substituted".

Claims 12-38 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-23 of copending Application No. 10/777,455 for the reasons set forth in the Office Action of August 31, 2004.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Since the Terminal Disclaimer has not been filed at the time of the instant Office Action, the above stated provisional rejection has not been overcome.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
